

NIOSH approved disposable respirators for food processing & manufacturing

Particulate Filter Types

| | FILTER LEVEL | | |
|----------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------|-----------------------------------------------------------------|---------------------------------------------------------------------|
| FILTER CLASS | 95 95% efficient at removing particulates 0.3 µm in diameter | 99 99% efficient at removing particulates 0.3 µm in diameter | 100 99.97% efficient at removing particulates 0.3 µm in diameter |
| N Not resistant to oil particulates Use where there's no oil particulate | N95 | N99 | N100 |
| R Resistant to oil particulates Use where there's no oil particulate, or up to one shift where there is | R95 | R99 | R100 |
| P Oil Proof Use where there's oil particulates for more than one shift | P95 | P99 | P100 |
