performance**

Resources and Support

We support you with:

- 1) iCOR registration
- 2) Free intro workshop
- 3) Free readiness review
- 4) Safety advisory support
- 5) Audit

You're Not Alone

osse@safetyalliancebc.ca

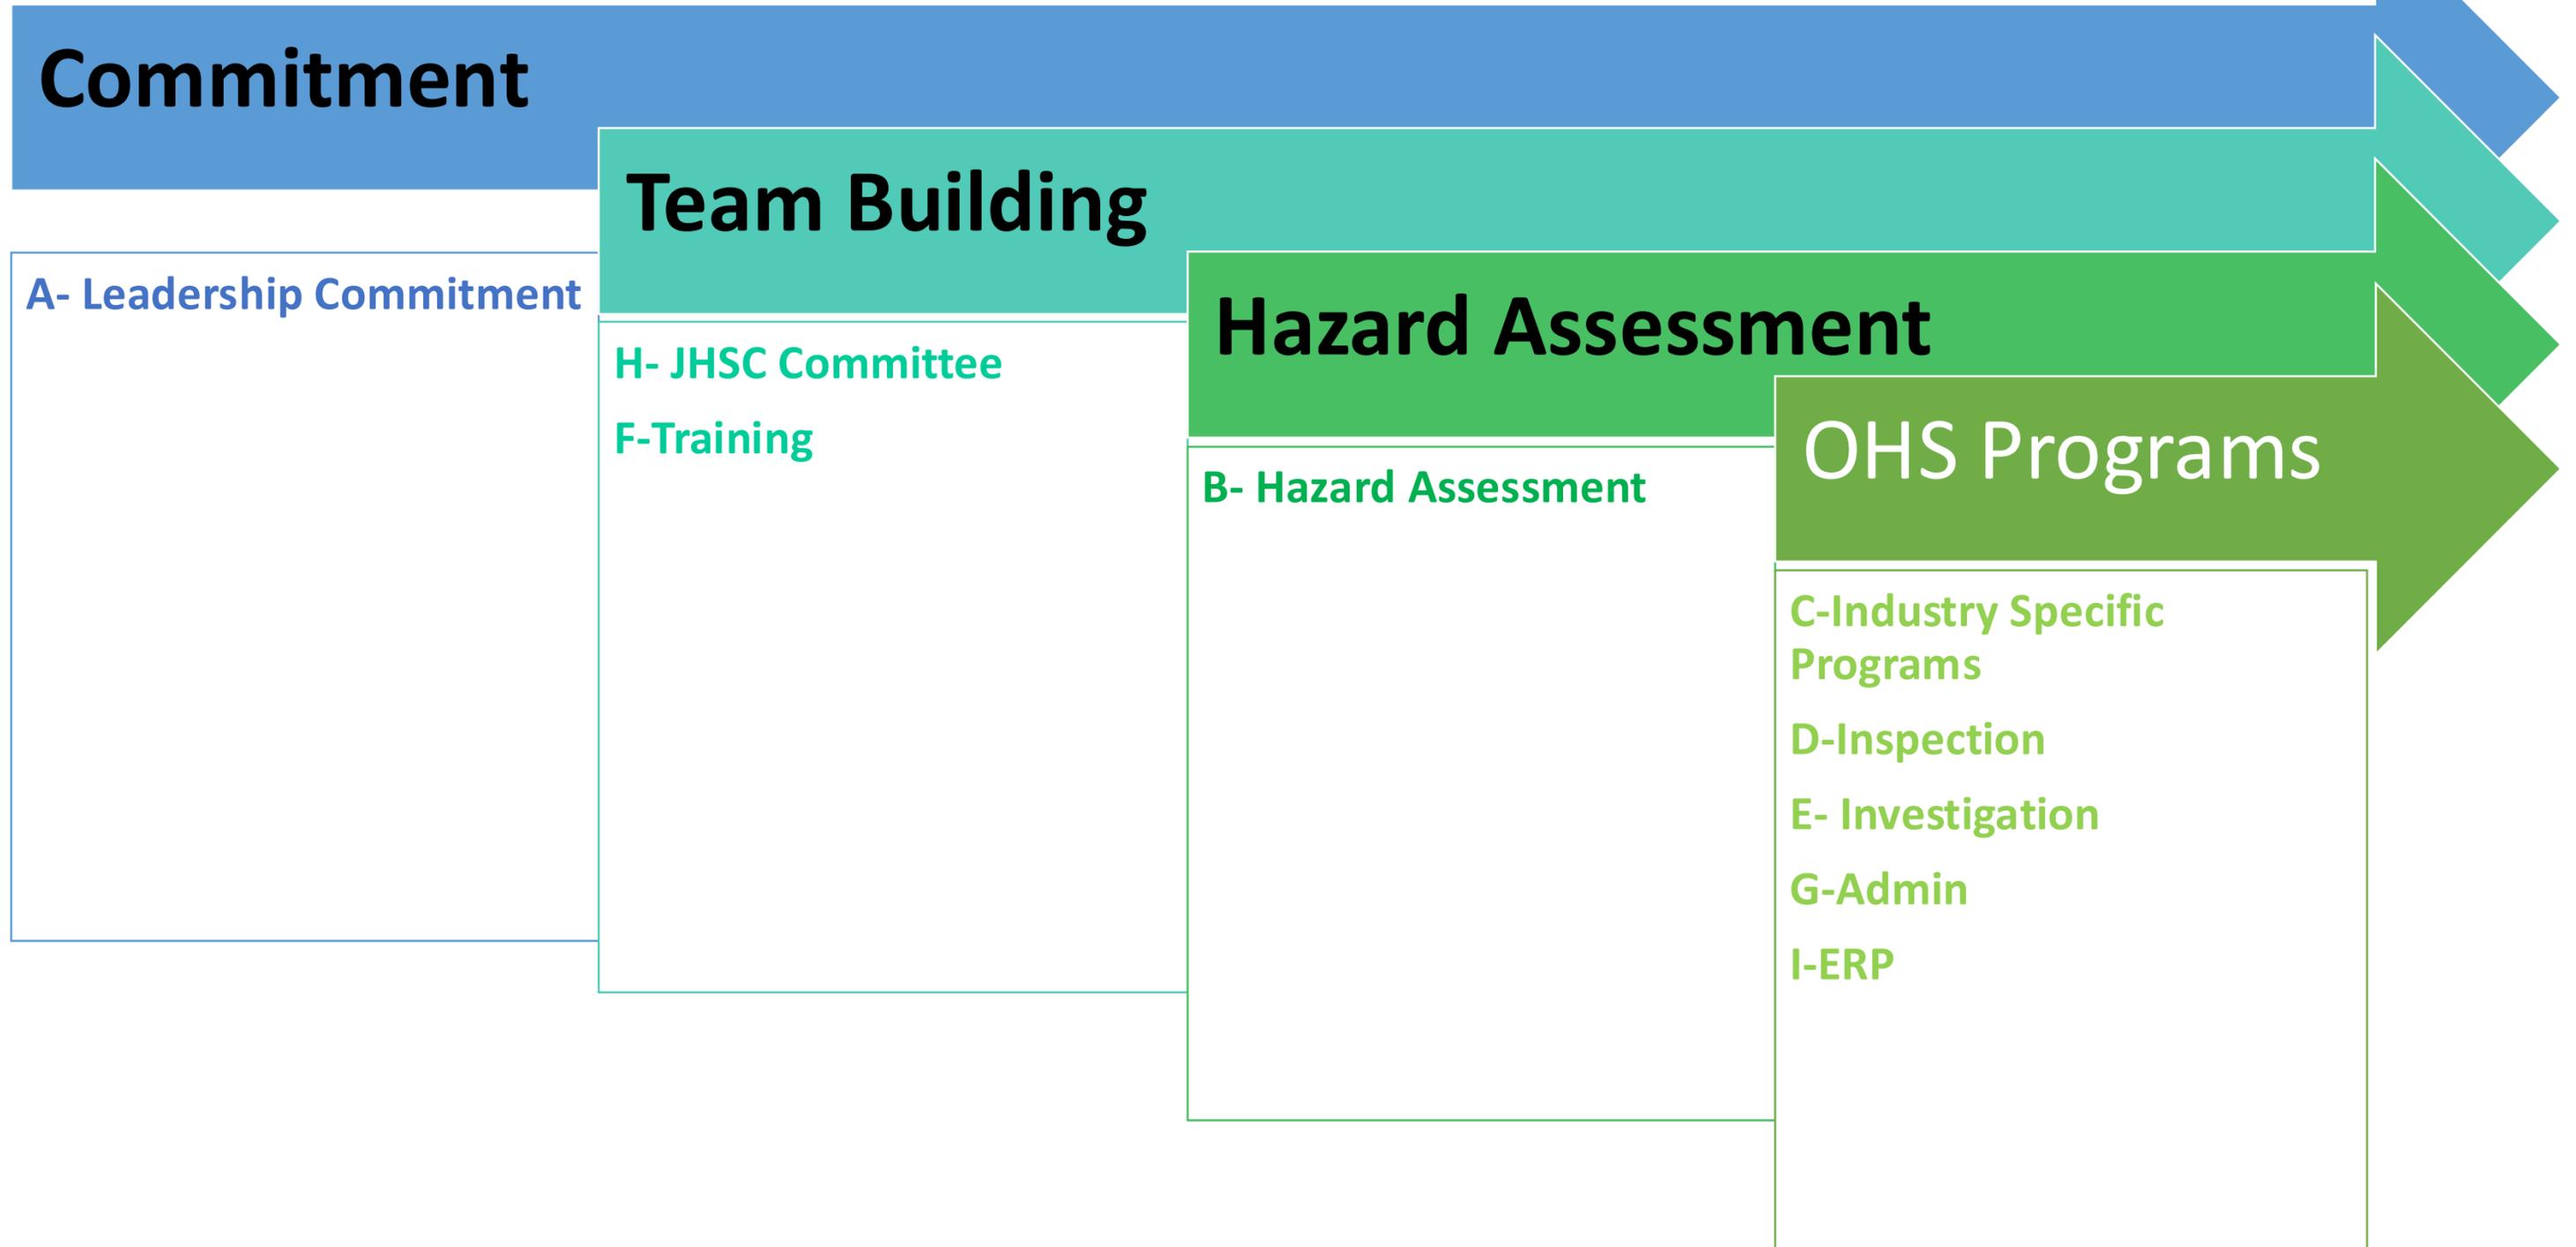

The Certification Process

Large
[20+
employees]

Small
[10–19]

Micro
[<9]

OSSE Implementation Strategy

Do:

- ✓ **Make sure top management understands the real benefits**
- ✓ **Develop a comprehensive training plan for all staff**
- ✓ **Use a realistic hazard and risk assessment, not a generic checklist**
- ✓ **Involve workers and supervisors in hazard identification and inspections**

Don't:

- ✘ **DON'T Rely on generic templates without proper customization**
- ✘ **DON'T treat certification as a one-time thing—**
Not an “audit season” project
- ✘ **DON'T rely on PPE alone—**
High-risk hazards require engineering, administrative, and behavioral controls

Thank You!
