ABOUT OUR COMPANY

Kearns Technology Inc. (KTI) helps clients optimize their infrastructure and achieve their goals, through customized strategies and by augmenting their teams as necessary.

KEARNSTECHNOLOGY.COM

WE PROVIDE

Managed Services bound by a contractual, service-level agreement that states the performance and quality metrics of our relationship.

01

WE CAN

Detect problems in real time through remote monitoring. We provide an open line of communication through a service desk ticketing program.
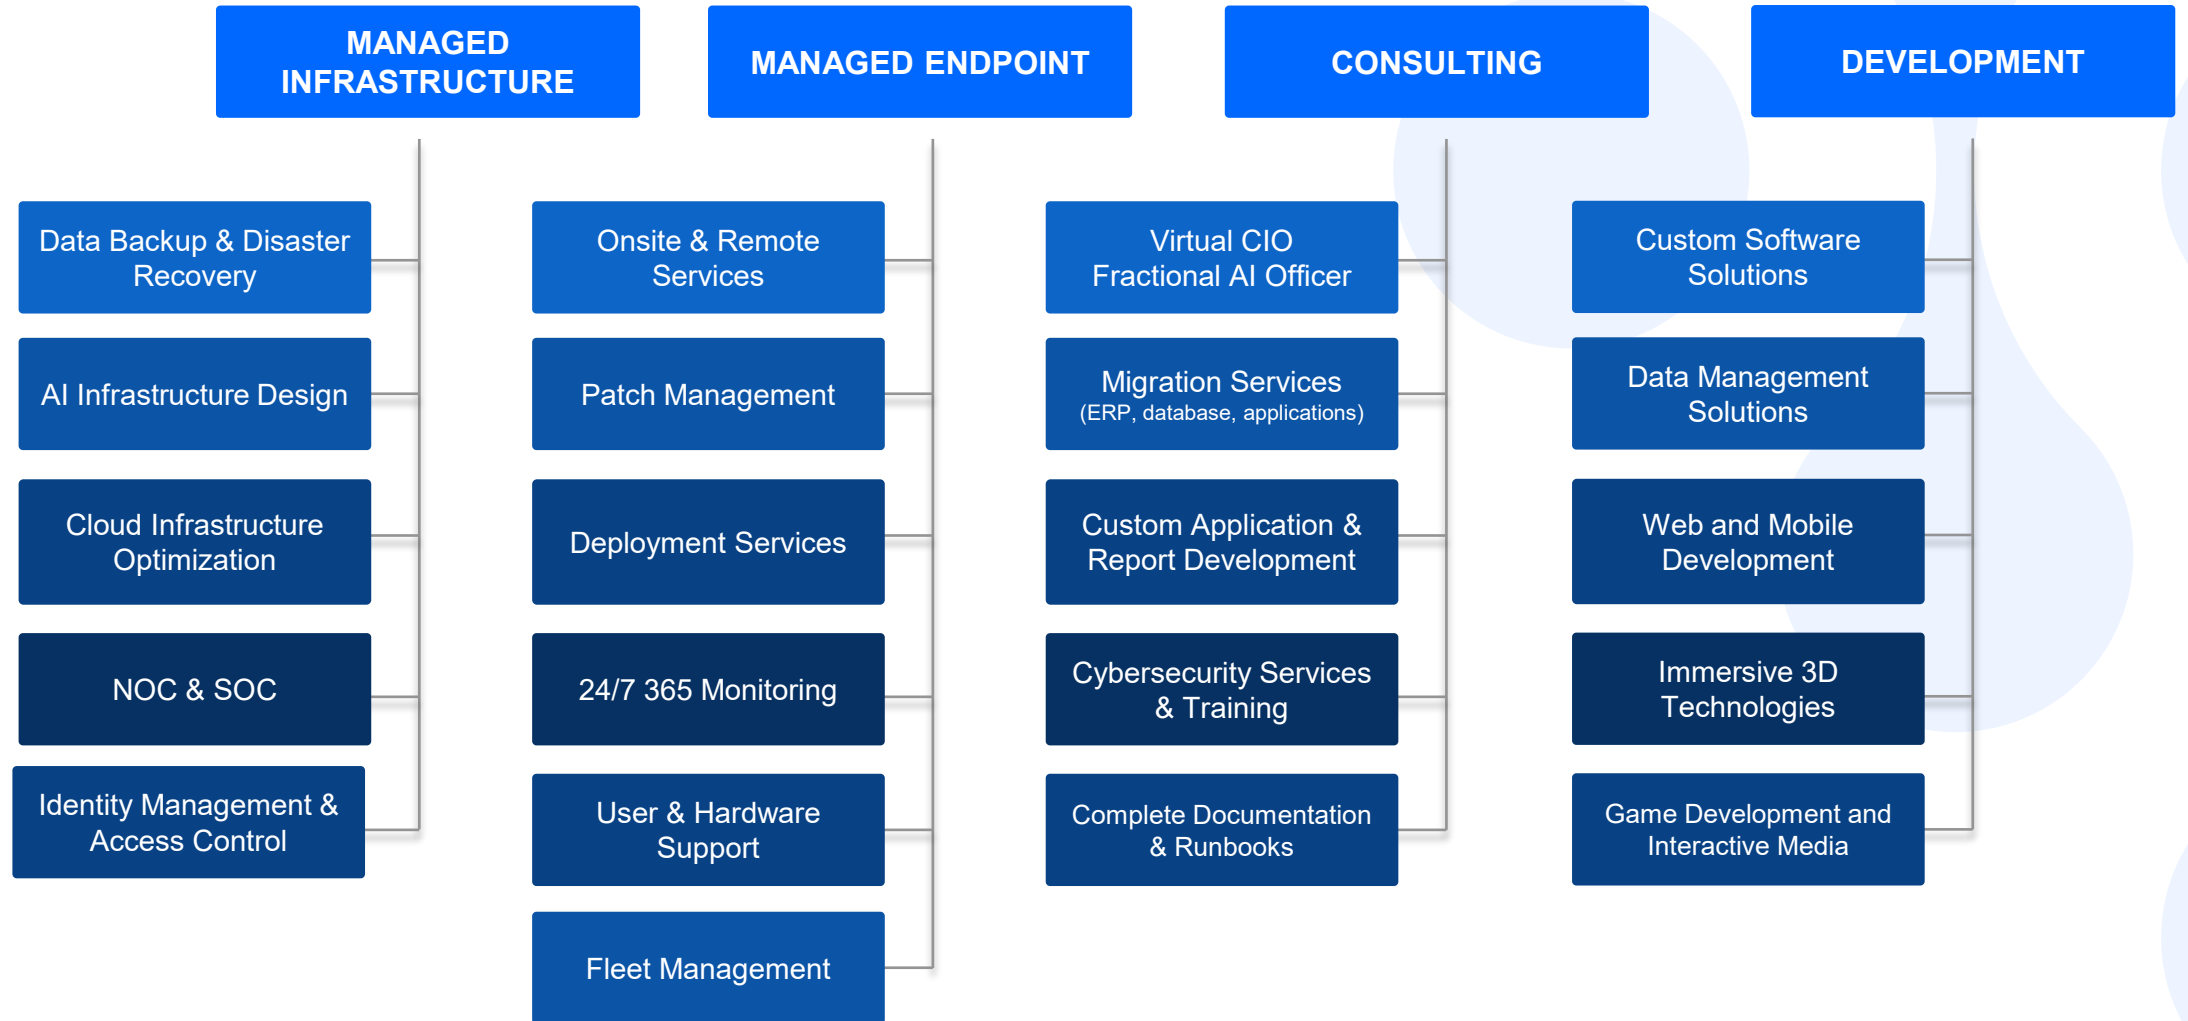

02

WE ARE

Agile and structured. Our average response time is under one hour. We have met 100% of our client SLAs in the last two years.

03

KTI'S DIFFERENTIATORS

01 AUGMENT > Work with existing IT teams - provide seamless support - ensure proper knowledge transfer and visibility to stakeholders.

02 LEAD > Provide leadership with IT best practices for our clients - allow them to remain armed with most up-to-date methodologies and process.

03 OPTIMIZE > Improve reliability of IT systems - enhance IT decision-making through data analysis - ensure value and accuracy of systems in active use.

04 SCALE > Identify vertical integration options with our clients - maintain regular communication cadence - streamline sharing of goals and outcomes.
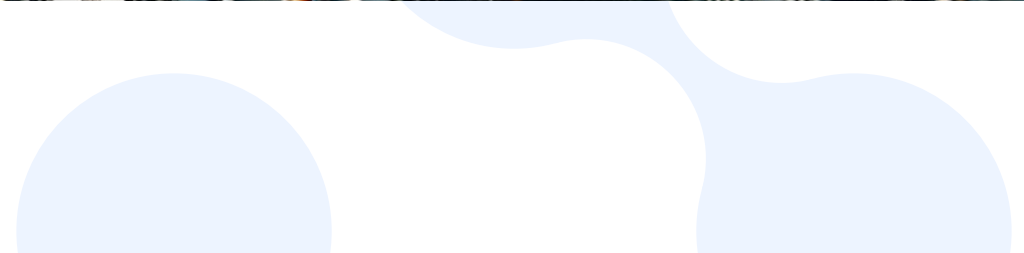

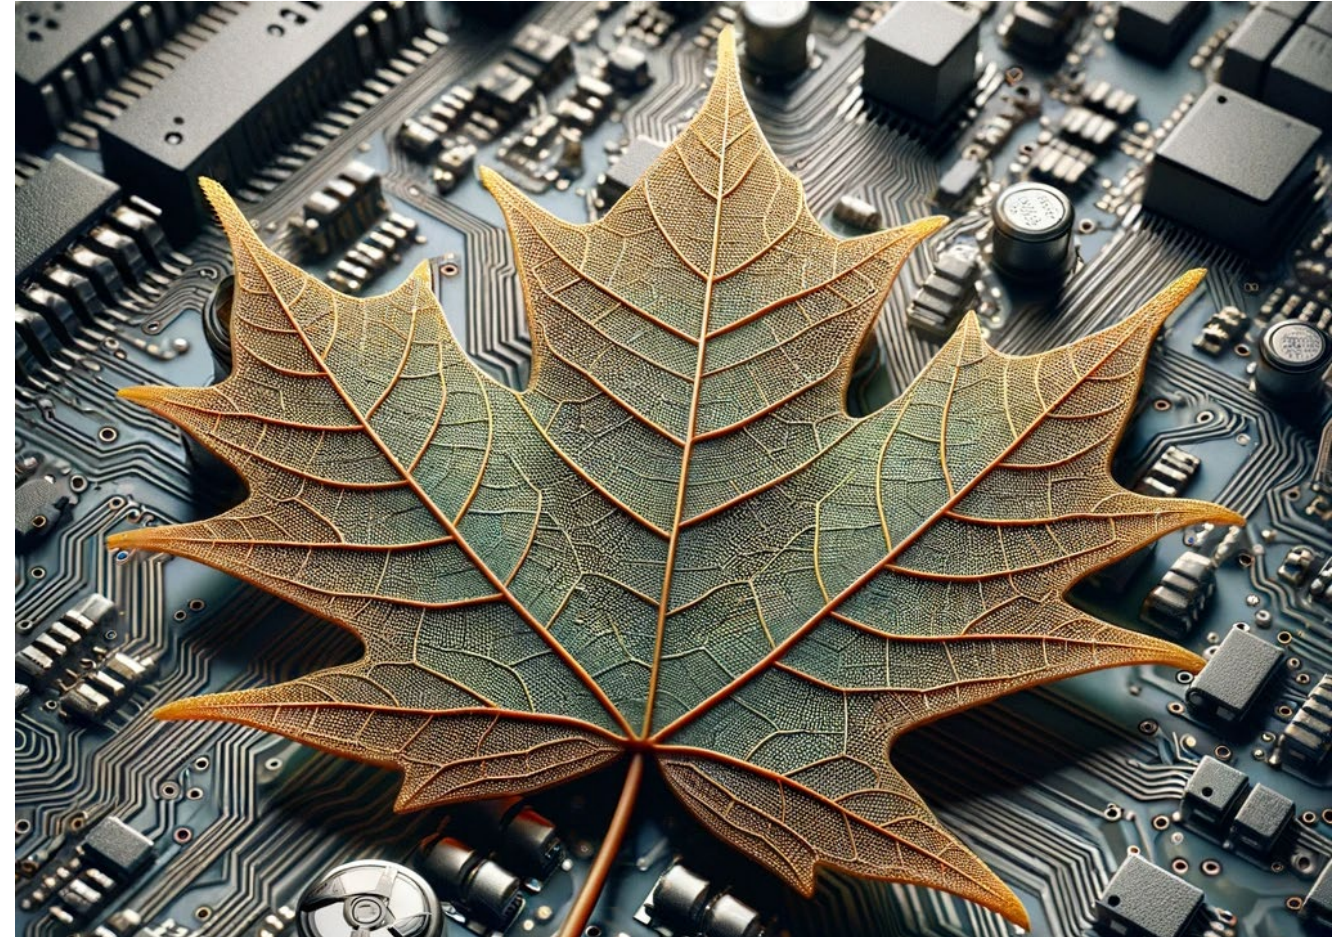

SUSTAINABILITY

WHAT DOES IT MEAN AT KTI?

WE WILL:

Endeavor to suggest solutions that increase energy efficiency of IT services.

Enable sustainability through redeploying unused hardware or procurement through secondary markets, without compromising quality.

Provide a platform for traceability and analytics.

A SAMPLING OF

OUR WORK FOR CLIENTS*

Utilize AI-powered machine vision at the edge to enhance the speed and efficiency of component manufacturing.

Implement an iterative process model in product manufacturing to minimize waste and boost efficiency.

Utilize machine vision systems to conduct safety inspections and facilitate the documentation process.
