

How the Manufacturing Safety Alliance of BC can help you with Crane and Rigging Safety

Specialized Services:

- Provide onsite consultations for your safety program
- Review your existing Crane Safety Program to identify any gaps
- Assist you with generation and implementation of a Crane Safety Program
- Connect you with our partners for specific crane and rigging training needs

BC Crane Safety

- Formed in 2005 to create a certification program for crane operators in B.C.
- Involved with 50+ industries to develop the certification program— alongside regulators, crane operators, owners, certification partners, government, and others.
- Working to develop more resources and training specifically for crane, rigging, and hoist safety within manufacturing.
- Currently, overhead crane operation is **not** included in the 11 types BC Crane Safety certifies for.
- We will be hosting a follow-up Ask Me Anything with BC Crane Safety OHS Advisors.
