

## 5S for a Safer, Happier Workplace

5S Improves workplace efficiency, generates profitability, improves employee morale AND it makes your business SAFER!

June 15, 2023

5S is the improvement methodology that makes a business **clean** and **organized**. Sparkling clean. When a business is clean and organized, work becomes easier - less of a struggle. It also becomes **safer**.

5S started in Japan with Toyota. Today it is practiced faithfully by scores of renowned Fortune 500 companies like Boeing, Caterpillar and more.

When people walk into a business that practices 5S, they immediately notice how impeccably clean and shiny the business is. First impressions matter – and so does **SAFETY**. An effective housekeeping program has proven to significantly reduce the occurrence of workplace injuries.

5S is inexpensive and pays large dividends in safety, productivity, mental health and ultimately, profitability.

**Bruce Ennis** is a Lean Master and **5S expert** that has spent 20 years implementing 5S programs across North America. On June 15, join Bruce as he discusses how easy it can be to implement a high performing 5S program at your workplace.
